1 Executive Summary

What was built, why, and what it achieves

The **Shree Kundodari Cement Products Portal Launcher** is a professional, single-URL landing page that presents two separate web portals — a **B2B Customer Store Front** and a **Management Administration Dashboard** — through a unified, branded entry point, inspired directly by the OpenCart demo page model at opencart.com/index.php?route=cms/demo.

Just as OpenCart presents "Store Front" and "Administration" side-by-side from one URL, the Shree Kundodari portal launcher presents both interfaces with live interactive monitor mockups, distinct login modals, role-based access, and a polished B2B brand experience — all in a single self-contained `index.html` file requiring zero build steps.

FULL DEPLOYMENT

Core Concept

One URL → Branded landing page → User clicks Store Front OR Administration → Separate login modal with credentials → Portal launches. This mirrors exactly how OpenCart's demo works, adapted specifically for a cement manufacturing B2B business in Pune, Maharashtra.

2 Concept & Inspiration – The OpenCart Model

How opencart.com/demo inspired this architecture

2.1 What OpenCart Does

OpenCart's demo page presents two monitor-style previews side-by-side: "Store Front" (the customer-facing shopping experience) and "Administration" (the merchant management panel). A visitor can click either to launch the corresponding demo. This dual-portal model is now the industry standard for B2B and e-commerce SaaS platforms.

2.2 How Shree Kundodari Adapts It

OPENCART ORIGINAL	SHREE KUNDODARI ADAPTATION
Generic e-commerce store front	Cement & building materials B2B storefront specific to Indian market
OpenCart admin panel	23-module manufacturing management dashboard (production, wages, dispatch, payments)
Generic monitor screenshots	Live interactive SVG mini-previews showing actual KPI data (₹9.8L revenue, 24,600 blocks)
Single login form	Separate login modals — one blue (Store Front), one red (Administration) — with role selector
Generic branding	Full Shree Kundodari brand identity: gold SVG logo, red brand colour, Rajdhani/Inter fonts, Devanagari श्री mark
No regional adaptation	9-language support, ₹ currency, Indian holidays, GSTIN, PF calculations, IS-certified products
External CSS/JS files	Single self-contained index.html — opens by double-click, no server needed

2.3 Side-by-Side Comparison

STORE FRONT

B2B Customer Portal

The customer-facing interface for B2B buyers to browse products, order, track and pay.

- Browse 6 cement product SKUs
- Request quotes with custom quantities
- Track delivery status in real-time
- Pay via QR, NEFT, Card, Cash
- Available in 9 Indian languages
- Account management & order history

ADMINISTRATION

Management Dashboard

The internal management dashboard for all staff with role-based access control.

- 23 operational modules
- Production tracking & shift logs
- Labour attendance & payroll (PF 12%)
- Payment centre — all 7 methods
- Dispatch 6-step tracker (incl. Payment Received)
- Reports, charts & analytics

3.1 Page Layout – Top to Bottom

1 Sticky Navigation Bar (Dark background)

Contains the Shree Kundodari SVG logo, brand name & subtitle, navigation links (Home / Features / Products / Contact), and an "Admin Login" red CTA button in the top-right. Sticks to top on scroll using `position:sticky; top:0; z-index:100`.

2 Hero Section

Centred headline: "One Portal. Two Powerful Interfaces." with location tagline (Bhosari MIDC, Pune), descriptive subtitle, and the brand tagline "Build your dreams with our passion" in gold italic. Background is light grey (`#f0f2f7`) for visual breathing room.

3 Dual Portal Cards (The OpenCart-style section)

Two cards side-by-side, each containing: a monitor mockup with live interactive preview, a type chip (blue=Store / red=Admin), title, description, feature bullet list, and a coloured CTA button. Cards lift on hover (`transform:translateY(-6px)`) with elevated shadow.

4 Statistics Band (Dark background)

Six business metrics displayed in gold on dark: 2 Portals from 1 URL, 5 Admin Roles, 23 Admin Modules, 9 Languages, 6 Product SKUs, 7 Payment Methods. Reinforces product depth after the portal cards.

5 Features Grid

Six feature cards in an auto-fit grid: Quote Builder (GST 18%), Payment Centre (7 methods), Labour & Payroll, Dispatch Tracker, 9 Languages, Indian Calendar 2026. Each card has a coloured icon badge, Rajdhani heading, and Inter description. Scrolled to when "Features" nav link is clicked.

6 Footer (Dark background)

Three-column layout: brand name & full address with GSTIN, contact links (phone / email / UPI), and copyright notice. Full company identity in compact professional footer.

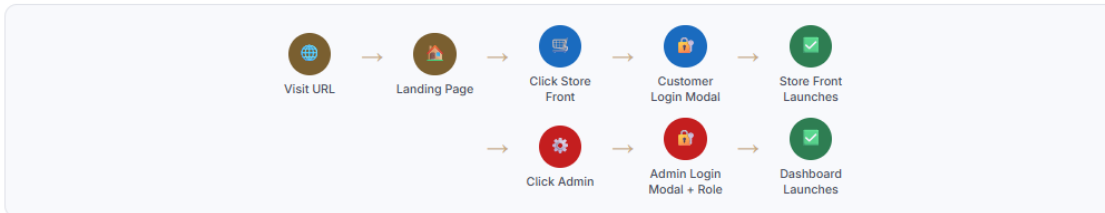

7 Overlay Layers (hidden by default)

Three fixed-position overlays: Store Front Login Modal (blue), Administration Login Modal (red), and a Launch Confirmation overlay. These are activated by button clicks and dismissed via Escape key or Cancel button.

7 Overlay Layers (hidden by default)

Three fixed-position overlays: Store Front Login Modal (blue), Administration Login Modal (red), and a Launch Confirmation overlay. These are activated by button clicks and dismissed via Escape key or Cancel button.

3.2 Full Page Flow Diagram

4.1 Purpose & Target Audience

The Store Front is the **customer-facing interface** for registered B2B buyers — construction companies, contractors, builders, and infrastructure firms who purchase cement blocks from Shree Kundodari Cement Products. It is the equivalent of an e-commerce storefront, built specifically for India's B2B construction materials market.

4.2 Monitor Mockup Preview (What Appears on the Card)

The Store Front card shows a live rendered HTML preview inside a CSS monitor frame. The preview contains three visible sections:

PREVIEW SECTION	CONTENT	VISUAL DETAIL
Navigation Bar	"KUNDODARI" logo-text, Products / Orders / Contact links	Blue background (<code>#1a6bbf</code>), white text, 28px height
Hero Banner	"Shree Kundodari Cement Products", "IS Certified Blocks & Pavers", "Order Now →" button, 🏠 emoji	Light blue gradient background, two-column layout
Product Grid	3 product cards: Solid Block ₹37, Hollow Block ₹40, Paver Block ₹28	3-column grid with 🧱 🏠 🏡 emoji icons and blue price labels

4.3 Store Front Features (Full Portal)

FEATURE	DESCRIPTION	INDIAN B2B SPECIFIC
Product Catalogue	All 6 SKUs with IS standard, price per unit, stock bar	IS 2185 / IS 15658 certification labels
Quote Request	Select product + quantity → generate quote → receive via WhatsApp/Email	MOQ 100 units; 5–10% bulk discount
Order Placement	Multi-channel: Portal, WhatsApp, Email, Phone	WhatsApp Business API integration
Delivery Tracking	6-step real-time tracker per order	Vehicle number, driver contact, ETA
Payment Gateway	QR/UPI, NEFT, Card, Cheque, Cash	kundodari@upi; ₹ formatting; GST 18%
Account Management	Order history, outstanding balance, credit limit	GSTIN verification, Net 15/30 terms
Language Switcher	9 languages available in language bar	Kannada, Tulu, Konkani for coastal customers
Dark/Light Mode	Toggle in corner	Better visibility in field/site environments

4.4 Registered B2B Customers

COMPANY	CITY	CREDIT TERMS	STATUS	LTV
Rajesh Constructions	Pune	Net 15	Active	₹4.2L
Patil Builders	Nashik	Net 30	Active	₹2.8L
Suresh Infra	PCMC	Advance	Active	₹2.1L
Ganesh Homes	Lonavala	Net 30	Overdue	₹1.3L
Omkar Infrastructure	Pune	TBD	Pending	—

5 Administration Dashboard

All 23 modules, 5 roles, and what staff can access

5.1 Purpose & Access Control

The Administration Dashboard is the **internal management portal** for Shree Kundodari staff. It provides five role-based access levels and 23 functional modules covering every aspect of the cement manufacturing and B2B sales operation.

5.2 Admin Roles

ROLE	PRIMARY SECTIONS	KEY RESPONSIBILITY
Proprietor / Director	Overview, Reports, Ledger, Payments, Pipeline	Revenue KPIs, P&L, cash flow, strategic decisions
Production Manager	Production, Inventory, Raw Materials, Labour	Daily output, cement stock alerts, shift logs
Sales Executive	Orders, Quote Builder, Customers, Online Orders	B2B order management, quote generation, CRM
Accounts Manager	Ledger, Payments, Wages, Reports	Transaction recording, payroll, GST reports
Store Manager	Inventory, Dispatch, Catalogue, Raw Materials	Stock management, dispatch coordination

5.3 All 23 Modules

OPERATIONS GROUP (6 MODULES)			
overview	8 KPI cards + charts	orders	Filter table, status badges
quote	Multi-product + GST 18%	inventory	6 SKUs, stock bars
production	Weekly chart, shift log	rawmat	Cement, sand, aggregate
B2B COMMERCE GROUP (6 MODULES)			
catalogue	Product cards + CTA	customers	Accounts + credit mgmt
pipeline	Kanban + donut chart	ledger	Transactions (CR/DR)
dispatch	6-step tracker	online-orders	Multi-channel orders
PAYMENTS (1 MODULE)			
payments	— 7 methods × 2 directions × confirm modal × receipt × history × AR tracker		
HR GROUP (3 MODULES)			
labour	15 workers, check-in/out, live clock	wages	PF 12%, advance, 4 tabs
timesheet	P/A/½ grid, holidays excluded		
ADMIN GROUP (7 MODULES)			
notifications	Priority alerts	calendar	19 Indian holidays 2026
reports	Charts + 8 exports	map	Bhosari MIDC location
contact	Personnel table	settings	Company profile + toggles
about	Hero logo + team + values		

5.4 Admin Monitor Mockup Preview

The Administration card shows a pixel-perfect mini dashboard built entirely in HTML/CSS within the monitor frame. It includes:

MOCKUP ELEMENT	WHAT IT SHOWS
Sidebar	Shree Kundodari SVG logo + 8 coloured nav dot indicators (active ones in accent)
Top bar	"Overview — Shree Kundodari" in gold Rajdhani font on dark background
KPI row	4 mini cards: ₹9.8L Revenue (green), 24,600 Blocks (gold), 4 Pending (amber), 186 Cement (red)
Revenue bar chart	6 animated bars (Jan–Jun) with gradient fill from gold to light gold
Sales donut	CSS conic-gradient showing Solid 48% / Hollow 32% / Paver 20%
Transaction table	3 rows: Rajesh +₹18,500 (green), Patil ₹7,200 (amber), Suresh +₹22,400 (green)

6.1 Journey 1 – New Customer Visiting

- Lands on kundodari.com**
Sees the branded landing page: sticky nav with logo, hero headline "One Portal. Two Powerful Interfaces.", and the two monitor cards.
- Clicks "Open Store Front" (blue button)**
Blue modal slides in with customer login form. Demo credentials shown: customer@demo.com / demo123.
- Enters credentials and clicks "Sign In to Store Front"**
Credentials validated client-side. On success: modal closes, launch confirmation overlay appears confirming the portal has opened.
- Store Front portal opens**
The B2B storefront launches at kundodari.com/store showing product catalogue, pricing, quote request form, and account features.

6.2 Journey 2 – Staff Member Logging In as Admin

- Clicks "Admin Login" button in top-right navbar**
OR clicks the red "Open Administration" button on the Administration card. Both trigger the same admin modal.
- Admin modal opens (red-themed)**
Separate from customer modal. Contains: Username field, Password field, and a **Role selector dropdown** (Proprietor / Production Manager / Sales Executive / Accounts Manager / Store Manager).
- Enters admin / admin123, selects role**
System validates credentials. Role selection is stored for personalised welcome message in the launch confirmation.
- Dashboard launches with role-specific greeting**
"Welcome back, Production Manager! Opening the full 23-module management dashboard." The launch overlay shows the role name and lists all 23 modules available.

6.3 Journey 3 – Keyboard User

KEY	ACTION	CONTEXT
Enter	Submits active login form	When Store Front or Admin modal is open
Escape	Closes active modal or overlay	Closes SF modal, Admin modal, or Launch overlay
Tab	Focus moves between form fields	Standard browser tab navigation within modals
Click outside modal	Closes modal	Clicking the dark overlay behind modal dismisses it

6.4 Error State – Invalid Login

PORTAL	ERROR TRIGGER	ERROR MESSAGE	VISUAL
Store Front	Wrong email or password	✗ Invalid email or password. Try: customer@demo.com / demo123"	Red box with left border, slides in above form
Administration	Wrong username or password	✗ Invalid credentials. Try: admin / admin123"	Same red error box styling
Both	Empty fields submitted	Same error messages triggered	

7.1 Demo Credentials

STORE FRONT — CUSTOMER LOGIN		ADMINISTRATION — STAFF LOGIN	
Email	customer@demo.com	Username	admin
Password	demo123	Password	admin123
Access Level	B2B Customer	Roles Available	5 roles
Portal URL	kundodari.com/store	Portal URL	kundodari.com/admin

7.2 Admin Role Details

ROLE OPTION	SELECTOR VALUE	WELCOME MESSAGE	TYPICAL USER
Proprietor / Director	admin	"Welcome back, Proprietor!"	Business owner
Production Manager	production	"Welcome back, Production Manager!"	Factory floor manager
Sales Executive	sales	"Welcome back, Sales Executive!"	B2B sales staff
Accounts Manager	accounts	"Welcome back, Accounts Manager!"	Finance/accounts staff
Store Manager	store	"Welcome back, Store Manager!"	Inventory/dispatch staff

7.3 Modal Technical Specifications

PROPERTY	STORE FRONT MODAL	ADMIN MODAL
Trigger element(s)	"Open Store Front" card button, Store Front card click	"Open Administration" button, Admin card click, "Admin Login" nav button
Overlay background	rgba(0,0,0,.65) with backdrop-filter:blur(4px)	Same
Modal width	420px, max 90vw	420px, max 90vw
Header icon colour	Blue (var(--blue))	Red (var(--brand))
Submit button colour	Blue background, white text	Red background, white text
Open animation	opacity:0 → 1 + translateY(20px → 0)	Same
Auto-focus	Email input focused after 200ms	Username input focused after 200ms
Dismiss methods	Cancel button, Escape key, click overlay	Cancel button, Escape key, click overlay
Extra fields	None — email + password only	Role selector dropdown (5 options)
Error display	Red box above form fields	Red box above form fields
Success action	Close modal → show Launch overlay	Close modal → show Launch overlay with role name

⚠ **Demo vs Production Auth:** The current login is client-side JavaScript validation (checking hardcoded credentials). In a live production deployment, replace the `loginSF()` and `loginAdmin()` functions with proper backend API calls using JWT or session-based authentication.

8.1 Brand Colour Palette

Brand Red

#c41e1f

Brand Gold

#c9ab82

Brand Dark

#100802

Portal Blue

#1a6bbf

Success Green

#2e7d52

Warning Amber

#b57800

Body Text

#1a1d27

Page BG

#f0f2f7

8.2 Typography

Font	Used For	Weights	Example
Rajdhani	All headings, KPI values, brand name, CTA buttons, card titles	400, 600, 700	Shree Kundodari — "Build your dreams"
Inter	Body text, nav links, table cells, form labels, feature bullets, footer	300, 400, 500, 600	Cement & building materials B2B industry

8.3 Shree Kundodari SVG Logo Specification

The brand logo is always rendered as an inline SVG — never as an external image file. This ensures it loads instantly without any network request and scales perfectly at all sizes.

SVG Element	Visual	Symbolism
Rectangle base	#100802 dark brown fill, rx=10 (rounded)	Earth / concrete foundation
Gold halo circle	#ffd700 stroke, no fill, 60% opacity	Auspiciousness / divinity
श्री Devanagari text	26pt gold serif, 95% opacity	Sanskrit invocation of prosperity and blessing
Stone arch path	#c9ab82 quadratic bezier, 5pt stroke	Cement arches / construction heritage
Stone block rectangles	#6666/#7777 fill, rx=1, 4 blocks	Concrete blocks — the product itself
Red brand banner	#c41e1f rect, "KUNDODARI" in white 9pt bold	Brand identity nameplate / company name

Sizes used: 40×40px in navbar | 52×52px in page top-left banner | 46×46px inside sidebar | 24×24px in admin mockup | 46×46px in document covers

8.4 Key CSS Animations & Interactions

Interaction	CSS Effect	Value
Portal card hover	Lift + shadow	<code>transform:translateY(-6px); box-shadow:0 18px 50px rgba(0,0,0,.18)</code>
Modal open	Fade in + slide up	<code>opacity:0+1; translateY(20px+0); transition:.25s</code>
CTA button hover	Darken + lift	<code>background darker; transform:translateY(-1px); transition:.2s</code>
Nav links hover	Highlight	<code>background:rgba(255,255,255,.08); color:#fff</code>
Feature cards hover	Border + lift	<code>border-color:var(--gold); transform:translateY(-2px)</code>
Overlay backdrop	Blur	<code>backdrop-filter:blur(4px)</code>

9.1 Core Technologies

TECHNOLOGY	VERSION	USAGE IN LANDING PAGE
HTML5	Standard	Semantic structure — nav, main sections, modals, overlays
CSS3	Standard	CSS Custom Properties, Grid, Flexbox, Animations, backdrop-filter
JavaScript ES6+	Vanilla (no framework)	Modal logic, login validation, keyboard events, scroll, role handling
Google Fonts	CDN	Rajdhani (700,600,400) + Inter (600,500,400,300)
Tabler Icons	v2.44.0 CDN	All UI icons (shopping-bag, shield-lock, arrow-right, etc.)
SVG	Inline	Brand logo, monitor screen mockup charts

9.2 Why No Framework?

✓ Deliberate Choice: Vanilla HTML/CSS/JS

The landing page is intentionally built without React, Vue, or Angular. This means: (1) Opens by double-clicking index.html, (2) Zero npm install, zero build step, (3) Deploys to Vercel/Netlify in <2 minutes via drag-and-drop, (4) No breaking version changes from framework updates, (5) Maximum compatibility across all browsers and devices.

9.3 CSS Architecture

```
/* Landing page CSS Custom Properties */ :root { /* Brand colours */ --brand: #c41e1f; /* Shree Kundodari red */ --gold: #c9ab82; /* Warm gold accent */ --dark: #100802; /* Deep brown-black */ /* Portal colours */ --blue: #1a6bbf; /* Store Front blue */ --green: #2e7d52; /* Success / active */ --amber: #b57800; /* Warning / overdue */ /* Layout */ --bg: #f0f2f7; /* Page background */ --white: #ffffff; /* Card background */ --ink: #1a1d27; /* Primary text */ --line: #e2e4ea; /* Borders / dividers */ }
```

9.4 JavaScript Functions Reference

[Save as PDF](#)

FUNCTION	TRIGGER	ACTION
<code>openStoreFront()</code>	Store Front card click or button	Adds .open class to #sf-modal; auto-focuses email input after 200ms
<code>closeSFModal(e)</code>	Cancel button or overlay click	Removes .open from #sf-modal; checks event.target to allow overlay-click dismiss
<code>openAdmin()</code>	Admin card / button / nav CTA	Adds .open to #adm-modal; auto-focuses username
<code>closeAdmModal(e)</code>	Cancel button or overlay click	Removes .open from #adm-modal
<code>loginSF()</code>	Submit button or Enter key	Validates email+password; shows error or calls showLaunched()
<code>loginAdmin()</code>	Submit button or Enter key	Validates credentials; reads role selector; calls showLaunched() with role name
<code>showLaunched(icon, title, sub, url, info)</code>	Successful login	Populates and shows #launched-overlay with portal-specific content
<code>closeLaunched()</code>	Close button on overlay	Removes .open from #launched-overlay
<code>scrollToFeatures()</code>	"Features" nav link	Smooth scroll to #features section: <code>scrollIntoView({behavior: 'smooth'})</code>
Global <code>keydown</code> listener	Any keypress	Escape → closes active modal; Enter → submits active form

10.1 Monitor Frame CSS Structure

Each portal card contains a CSS monitor mockup built entirely without images. It uses layered `<div>` elements styled as monitor bezel, screen, stand, and base:

```
/* Monitor hierarchy */ .monitor-wrap + grey gradient background wrapper .monitor + relative container (max-width: 320px) .monitor-screen + dark bg, border-radius: 6px top, 3px border + contains: .sf-preview OR .adm-preview .monitor-stand + 60px wide, 16px tall, grey .monitor-base + 100px wide, 8px tall, lighter grey
```

10.2 Store Front Preview Components

CSS CLASS	WHAT IT RENDERS	KEY STYLES
<code>.sf-nav</code>	Blue navigation bar with "KUNDODARI" text and 3 links	background: #1a6bbf; height: 28px
<code>.sf-hero-banner</code>	Light blue gradient hero with headline, emoji icon, "Order Now →" button	background: linear-gradient(135deg, #f0f4ff, #e8f0fe); height: 72px
<code>.sf-prod-grid</code>	3-column product grid showing Solid, Hollow, Paver blocks	display: grid; grid-template-columns: repeat(3,1fr)
<code>.sf-prod-card</code>	Individual product card with emoji icon, name, blue price	background: #f8f9fc; border: 1px solid #e8eaf2

10.3 Administration Preview Components

CSS CLASS	WHAT IT RENDERS	KEY STYLES
<code>.adm-preview</code>	Full dark dashboard layout (dark bg #0d0f14)	display: flex; background: #0d0f14
<code>.adm-sidebar</code>	36px sidebar with logo + 8 nav dots	background: #13161f; border-right: 1px solid rgba(255,255,255,.06)
<code>.adm-sb-logo</code>	Shree Kundodari SVG logo at 24×24px	28×28px wrapper, dark bg
<code>.adm-nav-dot</code>	8 navigation indicator pills	width: 24px; height: 6px; border-radius: 2px; grey or accent
<code>.adm-kpi-row</code>	4-column KPI grid: ₹9.8L, 24,600, 4, 186	grid-template-columns: repeat(4,1fr); gap: 3px
<code>.bar-group</code>	6 vertical bars (Jan–Jun) with gold gradient	display: flex; align-items: flex-end; height: 32px
Donut SVG circle	CSS conic-gradient pie chart (Solid/Hollow/Paver)	18×18px div with conic-gradient colours
<code>.adm-tbl</code>	3-row transaction mini-table	Rajesh green, Patil amber, Suresh green

12 Deployment Guide

How to deploy all three files and get live URLs

12.1 File Structure for Full Deployment

```
your-project/ ├── index.html ← Landing page (this launcher) ├── store.html ← B2B Customer Store Front portal └── admin.html ←
Administration Dashboard (skcp_olo_v5.html)
```

12.2 URL Structure After Deployment

FILE	URL	WHO ACCESSES IT
index.html	kundodari.vercel.app/	Everyone — the branded landing page
store.html	kundodari.vercel.app/store	B2B customers after Store Front login
admin.html	kundodari.vercel.app/admin	Staff after Administration login

12.3 Vercel Deployment (Recommended)

Save as PDF

- 1 Go to [vercel.com](#) and sign in**
Free account — no credit card required. Use GitHub, Google, or email.
- 2 Click "Add New... → Project"**
Select "Deploy without a Git repository" option.
- 3 Drag all 3 files onto the upload area**
index.html + store.html + admin.html — drop them all together.
- 4 Leave all settings default → click Deploy**
Vercel auto-detects static files. No framework preset needed.
- 5 Receive your live URL**
Format: <https://your-project-name.vercel.app> — live in under 30 seconds.
- 6 Add custom domain (optional)**
In Vercel dashboard → Domains → add [kundodari.com](#) or any domain you own.

12.4 Alternative Deployment Options

PLATFORM	METHOD	URL FORMAT	COST
Vercel	Drag-and-drop or Git	yourname.vercel.app	Free
Netlify Drop	Drag to netlify.com/drop	random.netlify.app	Free
GitHub Pages	Upload to repo, enable Pages	username.github.io/repo	Free
Local Preview	Double-click index.html	file:///path/index.html	Free
Any Web Host	FTP / cPanel upload	yourdomain.com	Hosting fee

13 File Structure & Code Map

How the landing page HTML is organised internally

13.1 HTML Document Structure

```
<!DOCTYPE html> <html> <head> |— charset, viewport, title |— Google Fonts (Rajdhani + Inter) |— Tabler Icons v2.44.0 |— <style> CSS (all styles inline) </head> <body> |— <nav> — Sticky top navbar |— .hero — Hero headline section |— .cards-row — Two portal cards side-by-side | |— .portal-card (Store Front) | | |— .monitor-wrap + .monitor + .monitor-screen | | |— .sf-preview (live HTML preview) | | |— .card-info (chip, title, desc, features, btn) | | |— .portal-card (Administration) | | |— .monitor-wrap + .adm-preview (dark UI) | |— .card-info (chip, title, desc, features, btn) |— .or-divider — "— OR —" separator |— .stats-band — 6 business statistics |— .features-section — 6 feature cards grid |— <footer> — Company info + links |— #sf-modal — Store Front login overlay |— #adm-modal — Administration login overlay |— #launched-overlay — Post-login confirmation |— <script> — All JavaScript logic </body> </html>
```

13.2 CSS Section Map

CSS COMMENT BLOCK	STYLES COVERED
<code>/* — NAVBAR — */</code>	nav, .nav-logo, .nav-links, .nav-link, .nav-cta
<code>/* — HERO — */</code>	.hero, .hero-tagline (with decorative lines), h1, .hero-sub, .hero-italic
<code>/* — PORTAL CARDS — */</code>	.cards-row, .portal-card (hover), .monitor-wrap, .monitor, .monitor-screen/stand/base
<code>/* Store Front screen */</code>	.sf-preview, .sf-nav, .sf-hero-banner, .sf-products, .sf-prod-grid, .sf-prod-card
<code>/* Admin screen */</code>	.adm-preview, .adm-sidebar, .adm-sb-logo, .adm-nav-dot, .adm-kpi-row, .bar-group, .bar
<code>/* Card info section */</code>	.card-info, .card-type-chip, .card-title, .card-desc, .card-features, .feat, .card-btn
<code>/* STATS BAR */</code>	.stats-bar, .stat, .stat-val, .stat-lbl
<code>/* FEATURES GRID */</code>	.features-section, .feat-grid, .feat-card, .feat-card-icon
<code>/* FOOTER */</code>	footer, .footer-brand, .footer-links, .footer-link, .footer-copy
<code>/* MODAL */</code>	.modal-overlay, .modal, all form elements, .modal-btns, .modal-error
<code>/* LAUNCHED VIEW */</code>	.launched-overlay, .launched-box, .launched-icon/title/sub/url/info

14.1 Responsive Breakpoints

SCREEN WIDTH	LAYOUT CHANGES
≥ 900px (Desktop)	Two portal cards side-by-side 3-col feature grid Full navbar with all links
600–899px (Tablet)	Cards begin to wrap Feature grid: 2 columns Monitor mockups scale proportionally
≤ 600px (Mobile)	Portal cards stack vertically (1 column) Feature grid: 1 column Nav collapses Stats band: 3 per row Footer stacks vertically

14.2 Mobile CSS Rules

```
@media(max-width:600px) { .cards-row { flex-direction: column; align-items: center; } .portal-card { width: 100%; } nav { padding: 0 16px; } .stats-band { gap: 24px; padding: 18px 16px; } footer { flex-direction: column; text-align: center; } }
```

14.3 Keyboard Accessibility

KEY	BEHAVIOUR
Tab	Navigates through interactive elements: nav links → card buttons → modal fields
Enter (in modal)	Submits the active login form (SF or Admin)
Escape	Closes any open modal or the launch overlay (all three overlays handled)
Space / Enter on buttons	Standard browser button activation

14.4 Browser Support

BROWSER	SUPPORT LEVEL	NOTES
Chrome 90+	Full Support	Primary target browser; all features tested
Firefox 88+	Full Support	backdrop-filter needs webkit prefix in some versions
Safari 14+	Full Support	CSS conic-gradient supported from Safari 12.1
Edge 90+	Full Support	Chromium-based; same as Chrome
Chrome Mobile	Full Support	Responsive layout activates; cards stack vertically
Internet Explorer	Not Supported	CSS Custom Properties not supported in IE11

15.1 Phase 2 Enhancements (Short-term)

ENHANCEMENT	DESCRIPTION	PRIORITY
Real backend authentication	Replace JS credential check with Node.js/FastAPI JWT endpoint; store sessions securely	High
Actual portal routing	Clicking Store Front opens store.html in new tab; Admin opens admin.html — with URL query params for role	High
"Forgot Password" flow	Email-based OTP reset for both portals	Medium
Live product images	Replace emoji icons in monitor preview with actual cement block product photos	Medium
WhatsApp Order button	Direct "Order via WhatsApp" CTA linking to wa.me/+919876543210 with pre-filled message	Medium
Animated statistics counter	Stats band numbers count up (0 → 23, 0 → 9) on scroll into view using IntersectionObserver	Low

15.2 Phase 3 Enhancements (Long-term)

ENHANCEMENT	DESCRIPTION	PRIORITY
Customer self-registration	New customers can register company + GSTIN on Store Front; admin approves via dashboard	High
Real-time order tracking	WebSocket or polling to show live dispatch status from admin → customer portal	Medium
UPI payment gateway	Replace decorative QR with live Razorpay/PayU payment link generation	High
Mobile app wrapper	PWA manifest to install as home screen app on Android/iOS	Medium
Multi-language hero	Hero text "One Portal. Two Powerful Interfaces." rotates through 9 languages	Low
Analytics dashboard	Embed Google Analytics / Plausible to track landing page → portal conversion rate	Medium
Video background hero	Short 15-second loop video of cement blocks being made at the factory	Low

15 Quick Reference Card

Everything you need at a glance — pin this page

📖 STORE FRONT — Quick Ref

- **Trigger:** Click blue card or "Open Store Front"
- **Login:** customer@demo.com / demo123
- **URL:** kundodari.com/store.html
- **Modal colour:** Blue (#1a6bbf)
- **Access:** Catalogue, Orders, Quotes, Payments
- **Languages:** 9 (switchable in bar)
- **Products:** 6 SKUs, ₹28–₹44/unit
